#### 17 Performance Review

#### **Turnover**

The quarter registered a turnover of RM22,034 million a decrease in turnover of RM4,203 million as compared with the preceding year corresponding period of RM26,237 million. The decrease is mainly due to a still sluggish demand for plywood products domestically with a slight improvement in export sales. The average sale volume of 4,165M3 per month for this quarter is 20% less than 5,266M3 average sale for 2016 same quarter.

#### Loss before Tax

The Group registered a loss of RM1,557million as compared to loss of RM2,536 million in the same quarter last year. This represents a reduction of RM0.979 million in loss in the results for the last quarter. The loss is mainly due to the decrease in sales as stated above and a reduction in the volume produced as analysed below.

The drop in turnover and an increase in loss can be further analysed as follows:

The Group operates in two locations:-

- Sandakan, Sabah : Cymao and Inovwood plywood mills
- Klang, Selangor: Poly-ply Industries value added plywood mill.

The loss for the quarter mainly incurred by Sandakan operations as Poly-ply broke even for the last two quarters.

### **Drop in production volume-Sandakan Operation:**

There are two main reasons for the drop in production volume; one is the shortage of logs supply for the three months quarter as the persistent and unusual wet weather continued to hamper logs supply in Sabah affecting the plywood industry. This is reflected in the production volume for the quarter as analysed below.

Secondly, Cymao is undertaking a cost rationalization exercise to merge the two Sandakan mills into one production mill at Inovwood. The merging exercise started in December 2016 and by middle of January 2017, Cymao mill stopped production. The production volume as achieved below is short of the target production and is also below that of the average volume achieved in 2016 of 4,275 M3 a month due mainly the acute shortage of logs supply as stated below.

# EXPLANATORY NOTES TO THE QUARTERLY FINANCIAL STATEMENTS FOR THE SECOND QUARTER ENDED 30 JUNE 2017 - (UNAUDITED)

#### 17 Performance Review

2017	Inovowood mill-M3	Logs supplies-M3	Cymao-mill-M3
January	1,914	4,635	533
February	1,583	4,206	-
March	2,283	5,732	-
	5,780	14,573	<u>.</u>
April	2,406	5,734	-
May	2,209	5,696	-
June	1,164	3,119	-
	5,779	14,549	<u>.</u>
2016 Average Per Quarter	11,559	29,122	

The above analysis showed that Inovwood's production is very much hampered by the acute shortage in logs supply in the last 6 months. The positive effect is the cost rationalization is showing the cost saving benefit in the last quarter as the loss per M3 is reduced by RM100 per M3 production.

The initial target for Inovwood to increase its production volume to about 4,000M3 by May was not achieved as logs supply were very low and worsened in June. Logs supply was down to 3,119 M3 as compared to an average of 10,094 M3 per month in 2016.

From a costing perspective, the decrease in the production volume during the quarter increased the production cost and contributed also to the loss incurred.

Drop in sales volume (M3):

	30.06.2017	30.06.2016	Net change
Sandakan mills : Export	2,758	1,418	1,340
: Local	5,017	7,998	(2,981)
	7,775	9,416	(1,641)
Poly-Ply at Klang: Export	946	976	(30)
: Local	3,979	5,614	(1,635)
	4,925	6,590	(1,665)

As summarized, the drop in sales volume especially the local market volume, a drop of 4,616 M3 is substanitial thus the drop in sales value.

The average selling price for the plywood sales for Sandakan mills for the quarter is RM1,753 per M3 as compared to the average selling price of RM2,002, a drop of RM249 per M3. The above drop in sales volume and sales price for the Sandakan mills contributed the loss for the quarter as Poly-ply broke even this quarter.

The very low logs supplies for the quarter is a real disappointment as after the merger the cost is very much reduced and there is a realistic prospect of turning the operation into profitability. This is a setback with the business plan to turnaround the performance of Cyamo. However, management is embarking on a measure to expand and diversify the operation to Jengka, Pahang to be illustrated below.

The Group is continuing to explore positive business opportunities to enhance the core business performance. Arising from this, the Group has entered a lease agreement to lease a plywood factory in Pahang. The main reason is as Sandakan is experiencing a critical logs supply problem, this is an opportunity to manage the risk to tap into logs supply from West Malaysia as Jengka area in Pahang still has substantial supply of logs for plywood manufacturing.

The benefits of this leased mill will be more conclusive starting from October as there are additions and repairs of machinery for the next two months.
