17 Performance Review

Turnover

The quarter registered a turnover of RM28.948 million a decrease in turnover of RM0.533 million as compared to immediate corresponding period of RM29.481 million last year. The decrease in turnover is due to lower of production as a result of logs shortage. International export market has improved and for local domestic demand is sluggish. The average sale volume of 4.655 m3 per month this quarter is 9.77% less than 5,159 M3 average sales volume for 2016 same quarter. Production volumes also dropped from 10,038 m³ to 8,133 M3, a drop of 18.98% for this quarter as compared to the immediate corresponding quarter due largely to shortage of logs supply during the quarter.

Loss before Tax

The Group registered a loss of RM1.692 million as compared to a loss of RM3.213 million in the same quarter last year. This represents a reduction of RM1.521million loss this quarter. The loss is lower from a decrease in sales and production due to a lower cost of production and a slightly higher price and thus a better overall gross margin which has improved from -0.26% to 7.8%. Sandakan is in plywood production while Klang is in value-added plywood production and plywood trading. The loss for the comparative quarters is made up of:

	31.12.2017	30.12.2016
	RM`000	RM'000
Sandakan	(935)	(3,158)
Klang	188	189
Jengka	(639)	-
Other companies	(306)	(244)
Group loss	(1,692)	(3,213)

As explained, the decrease in loss in Sandakan is due to better margin despite lower sales. The margin in Klang also has improved but the profit is not much different from last quarter. Jengka operation was adversely affected by the breakdown of boiler in the last quarter thus incurring the loss.

EXPLANATORY NOTES TO THE QUARTERLY FINANCIAL STATEMENTS FOR THE FOURTH QUARTER ENDED 31 DECEMBER 2017 - (UNAUDITED)

17 Performance Review

Comparison with immediate preceding quarter's result:

As a result of decreased production volumes and the reduction in sales volumes, revenue has decreased by RM0.533 million or 1.8% as compared to the immediate preceding quarter. The gross profit for the Group has improved from -0.26% to 7.8% for this quarter as compared to the immediate preceding quarter. The lower loss this quarter of RM1.692 million from corresponding quarter of RM3.213 million before tax is due to a lower production cost as a result of the merging of the two mills in Sandakan.

The drop in sales volumes can be analyzed as follows:

	31.12.2017	31.12.2016	Net change
Sandakan mills : Export (m ³)	4,945	4,191	754
: Local (m ³)	3,743	5,094	(1,351)
	8,688	9,285	(597)
Poly-Ply at Klang: Export (m ³)	1,744	831	913
: Local (m ³)	3,533	5,362	(1,829)
	5,277	6,193	(916)

Both Sandakan and Klang recorded a lower sales for the last quarter as compared to the immediate corresponding quarter. This explained a lower sales for this quarter with a slight decrease in loss due to an improved gross profit.

Group's Prospect:

The last twelve (12) months has been challenging for the Group mainly due to shortage of timber logs supply in Sandakan thus a lower production volume. With the merger of the two (2) mills in Sandakan, the production cost is lower and therefore gross margin has improved. The international export market has picked up in the last six (6) months with the improve pricing but the local market is slow in sales with lower pricing. The Group is focusing more on export sales to capture the better margin.

As reported in the last quarter, in order to address the shortage of logs supply in Sandakan, the Group leased a plywood mill in Jengka, Pahang in July 2017. The rationale is there is sufficient logs supply in Jengka and the bulk of the veneer produced is shipped back to Sandakan for plywood processing. The trial run in the first three (3) months is positive both the logs supply and the operational efficiency. However, the boiler broke down in early November and the operation incurred losses on the last quarter. The contribution of Jengka will be more conclusive from 2018 onwards as there are still repairs and additions of machinery to the Jengka operation. With the improved export market and the Jengka veneer supply, Sandakan operation is showing signs of revival and looking forward to a better performance.

Klang operation has slowed down due to a slow demand for value-added plywood products. The challenge is for the Klang operation management to fix the situation and put more efforts to capture more customers and to manage the cost to bring the Klang operation to a better profitability.

The latest decision by the U.S Commerce Department on 13 November 2017 that it had made final determinations that hardwood plywoood from China was being subsidized. As a result, there will be anti-dumping and anti-subsidy duties imposed on China plywood selling to the U.S market. The Group has tapped into this opportunity on this development and it is expected to contribute positively to the Group operation.
